Gladland Acres Offer Fine Iris at Special Prices

Before acquiring the Gladland Bulb Farm we had planned to enter the Mail-Order field — with a collection of fine Iris — and had made tests of all promising varieties. When we moved to Oregon two years ago we brought with us only the most attractive of the varieties we were testing and growing. We soon found that Gladiolus would take our entire time — but in the meanwhile these Iris kept growing — and now it is necessary to reduce the quantity. It would be difficult to find a choicer list of varieties — as our testing included all of the newer Iris released up to 1946. We have divided these into 4 price sections — Section A @ 25c each — Section B @ 30c — Section C @ 35c and Section D in which each variety is priced according to its rarity and value. All of our Iris was transplanted 2 years ago — rhizomes will be slightly smaller than from 1 year plants — but are healthy and vigorous and should bloom

well the first season.

Not only the best of the tall bearded Iris are included — also a fine selection of the dwarf and intermediates are included. Deliveries will be made by parcel post beginning about July 15th. Minimum order accepted \$2.00. 3 rhizomes of a variety will be furnished at 2 times the each rate. **Special discount for early orders received prior to July 15:** on these you need only remit $\frac{3}{4}$ of the amount of the order. Example if your list totals \$8.00 remit only \$6.00. This discount is given for orders received before digging time — **But does not apply to special collection offers which are net.** Our brief description gives Name, height of flower stalk in inches, season of bloom — E for Early — M for Midseason — L for Late — and color in that order.

SECTION A—Popular dependable varieties, containing only outstanding and distinctive kinds. Each 25c

Alcina - 36" M - Cream & blue
 Alta California 48" M - Yellow & buff
 Ambassadeur 48" ML - Blend Hyssop & Carmine
